

**AMENDMENTS TO THE SPECIFICATION**

Applicant notes that the following reference to a paragraph is made with respect to the application as-published in International Application No. WO 2006/080707.

Please replace paragraph [47] with the following replacement paragraph:

--The moist air leaving the tub 110 during the drying cycle in the above embodiment flows through the blower 210 and the air duct 200. The air that is condensed while exiting the bottom of the air duct 200 passes through the moist air absorber 115 to be re-filtered ~~re-circulated~~. In other words, the condensed air that leaves the air duct 200 is diffused as it passes through the moist air absorber 115, and is expelled from the bottom of the dish washer 100. Accordingly, a user is not directly subjected to the air expelled from the air duct 200.--
